PADS FROM
BERDAL**

FENTO
BEST KNEE PROTECTOR EVER MADE™

GRIPLINE®

FENTO
BEST KNEE PROTECTOR EVER MADE

FENTO 100/150

FENTO 100 is the practical inlayer to go in the leg of your trousers. FENTO 150 is an external knee pad from the Pro series. Made with professional precision, suitable for both the pro and the DIY enthusiast.

Breathable and 100% watertight

For comfort under all conditions.

Effective pressure distribution

Thanks to the ergonomic wedge™.

Prevents knee and back problems

And that makes work that little bit more pleasant

FENTO

200 PRO/400 PRO

Designed in collaboration with medical specialists. And that's something that users will notice on their backs and knees.

✓ Perfect fit

Thanks to smart innovation and well-thought-out product development.

✓ 100% waterproof and flexible

Even the elastic band doesn't pinch behind the knee.

✓ Durable and very wear-resistant

Made for intensive use by professionals.

✓ Very high level of working comfort

Prevents injuries.

✓ Replaceable inlay

Easy to replace after normal use of approx. 6 months.

GRIPLINE TUINMAN

A knee pad that is best suited for light professional use as well as small-scale work around the house.

From our own factory

Trusted and high Berdal quality.

Rectangular version also available

More suitable for the professional.

Favourite of DIY stores

For the comfort of the DIY enthusiast.

GRIPLINE HARMONICA

Available in a short, long and comfort design to suit every professional and fitted with a replaceable inlay.

From our own factory

Trusted and high Berdal quality.

Comes with 4 folds

Easy to adapt to variable situations.

Extensively tested

For pressure distribution, penetration resistance and impact resistance.

LET'S BUILD TOGETHER

Berdal stands for working together. 'Let's build together' is our invitation to companies in the construction sector, the hardware sector and the DIY sector. We share our knowledge, such as through training sessions and demos by our sales promoter. We provide data management support, including by equipping our customers' ERP systems with product data. We also create market analyses to help customers to compile ranges. In addition, we develop sales campaigns together, thereby building on one another's successes. Let's build together.

SUSTAINABLE ENTREPRENEURSHIP

Berdal is aware of its responsibilities with regard to the environment. For example, we have subscribed to the Plastic Pact. The pact establishes four objectives for the reduction of plastic waste and for increased recycling by 2025. Berdal is also preparing for cradle-to-cradle certification. Berdal is thereby uniting closely with companies that choose sustainability and circularity. At product level, we opt for recycled and recyclable raw materials as far as possible for all our brands, and of course for sustainable production processes.

LET'S CARE TOGETHER

DIN CERTIFICATION

Berdal has obtained DIN 14404-EN:2010 certification for our knee pads Tuinman (no. 14) and Harmonica (no. 13, 13V and comfort). The products are tested for this by means of pressure distribution on an artificial knee. Penetration resistance and the impact resistance are also measured. The comfort of the knee pad is rated and the elasticity of the band checked. This is how we provide the quality that users are looking for.

WHY BERDAL?

- ✓ Self-managed production in the Netherlands and Poland
- ✓ Certified, homogeneous regranulated raw materials
- ✓ Guaranteed cadmium-free production
- ✓ Private labelling marketing options
- ✓ Reliable, innovative and service-oriented production company
